Storyboard & Approval Package — KMH-V1-INS-20785b5fa6bd · v1.0

Field	Value
Creative ID	KMH-V1-INS-20785b5fa6bd
Package version	v1.0
Date	2026-10-26
Product	Kids Mental Health Bundle (offer: "FREE Kids Mental Health Bundle" / "free today")
Selected variation	V1 — "Is your kid always dysregulated?" (#1 BEST BET)
Format	9:16 vertical, 55.055 s, 27 shots, hard cuts; English VO + burned-in captions
Reference	INS-20785b5fa6bd (`inspiration-breakdowns/INS-20785b5fa6bd-breakdown.md`)
Upstream	`adaptations/INS-20785b5fa6bd-KMH-adaptation.md` (Skill 2) · `adaptations/INS-20785b5fa6bd-KMH-V1-full-script.md` (V1 full script v1.0)
Production route	Kie.ai — Grok Imagine Video 1.5 (preview), 720p, 9:16, image-to-video from the keyframes
Editor / strategist	Role labels only — names not supplied
Package readiness	**Draft video built (`video/KMH-V1-INS-20785b5fa6bd-v1.0-draft.mp4`, 63.15 s). All 28 keyframes and all 27 clips inspected; 12 clips redone on Kie and passed. Not final: VO runs past 55.055 s (see §15) and S27 still shows the plain placeholder book**
Creative decision	**Awaiting strategist approval**

> **Draft status:** the V1 draft video is built and checked — see §15 for the file, clip QC, credits and VO timing. Two things keep it from being final: the stock voiceover is ~15 s longer than the 55.055 s edit at natural pace (the draft holds S27 until 63.15 s, and VO lines land up to ~9 s after their shots), and the real bundle cover (ASSET02) still needs to replace the placeholder book on S27.
>
> **V1 script approval:** the V1 full script v1.0 hasn't been approved yet. This package locks that wording; any change to it creates package v1.1.

1. Variation Previews

V1 — ALWAYS DYSREGULATED · #1 BEST BET

Visual preview	
	Frames (open now): KF-S01-02 · KF-S17-01 · KF-S27-01

Visual preview	
Audio preview	`audio/KMH-V1-INS-20785b5fa6bd-v1.0-V1-audio-preview.mp3` (*Preview audio — not final mix*; built by `build_assets.sh`). Raw VO now: AUD-V1-VO
Script	**B01 Hook (0:00–0:03)** — Headline "Kid Always DYSREGULATED?" + VO "Is your kid always dysregulated, melting down over little things?" over the split screen. **B02 Product reveal (0:33–0:38)** — VO "Just one printable feelings chart with your kid every day" → "can help them name feelings," (mom and kid with the chart; light path clears the storm). **B03 CTA (0:54–0:55)** — VO "Grab yours free." (mom holds up the bundle).
Angle	Dysregulated Kid — self-identification question
Persona	Mom raising kids, 35-44 ("Overwhelmed Olivia")
Why we're using it	• KM-388-INS-130 (Dysregulated Kids): $1,699 → 1.13 ROAS, $12.97 per sale • Women 35-44 = 39.3% of sales on 35.8% of spend • Research: "…waiting for the next explosion to occur, usually over something small."

V2 — MOM BARELY HOLDING ON · #2 STRONG

Audio preview	`audio/KMH-V1-INS-20785b5fa6bd-v1.0-V2-audio-preview.mp3` (*Preview audio — not final mix*; built by `build_assets.sh`). Raw VO now: AUD-V2-VO
Script	**B01 Hook (0:00–0:03)** — Headline "Losing Your CALM?" + VO "Is your kid always dysregulated, and you're barely holding on?" **B02 Product reveal (0:33–0:38)** — VO "Just five minutes of coping skills together every single day" → "can help you both reset," **B03 CTA (0:54–0:55)** — VO "Grab yours free." (same CTA frame as V1)
Angle	Dysregulated Kid — co-regulation (calm mom, calm kid)
Persona	Mom raising kids, 35-44, who never learned these skills herself
Why we're using it	• KM-324-INS-072 (co-regulation): $961 → 1.06 ROAS • Top pain, 92 upvotes: "I have zero emotional regulation skills and it's messing my son (4) up."

V3 — EVERY TIME PLANS CHANGE · #3 SOLID

Visual preview	
	Frames (open now): PV-V3-01 · PV-V3-02 · KF-S27-01

Visual preview	
Audio preview	`audio/KMH-V1-INS-20785b5fa6bd-v1.0-V3-audio-preview.mp3` (*Preview audio — not final mix*; built by `build_assets.sh`). Raw VO now: AUD-V3-VO
Script	**B01 Hook (0:00–0:03)** — Headline "Always Melting DOWN?" + VO "Every time plans change, it starts with a little meltdown." **B02 Product reveal (0:33–0:38)** — VO "Just one printable feelings thermometer on the fridge every morning" → "can help them notice feelings," **B03 CTA (0:54–0:55)** — VO "Grab yours free." (same CTA frame as V1)
Angle	Dysregulated Kid — everyday-trigger story
Persona	Mom raising kids, 35-44
Why we're using it	• KM-525-INS-029 (narrated mom story): 33.2% hook / 16.5% hold, 1.08 ROAS — the only video in the sweet spot • Very-high-hook videos (46–58%) hold only 4.6–7.8% and make 0.69–0.95 ROAS

2. Concept summary

- **Test:** first narrated, story-driven "dysregulated kid" video aimed at moms 35-44, built on the reference ad's 55-second structure (problem 60% → "what if" turn → daily-habit product intro → "No more" contrast → payoff → 3-word CTA).

- **Why:** dysregulated-kid is the best-ROAS angle (KM-388 1.13, KM-324 1.06); women 35-44 are 39.3% of sales; mom-briefed concepts so far used ADHD/POV hooks and underperformed (KM-420 0.33, KM-437 0.25, KM-530 0.82).
- **Offer:** "the free Kids Mental Health Bundle" (A19) + CTA "Grab yours free." Disclose any processing fee at checkout.
- **Claims:** "can help them name feelings", "lighter and more peaceful", "calmer evenings" — no diagnosis, ADHD, treatment or cure language.

Headline (S01, 0.000–2.703): Kid Always DYSREGULATED?

VO: Is your kid always dysregulated, melting down over little things? Then the shoes feel wrong. Their whole body goes rigid. Big feelings get trapped inside. Constant tears, slamming doors. And that tense feeling just won't go away. Soon, asking for something simple starts feeling like a risk. You brace yourself mornings, dinners, bedtimes. And instead of enjoying your kid, you're waiting for the next meltdown to start. Day after day, your home feels loud, tense, and exhausting, leaving you drained before your day is even over. What if your kid has been asking for a different kind of support? Just one printable feelings chart with your kid every day can help them name feelings, and leave your home feeling lighter and more peaceful. No more bracing yourself before every request. No more worrying about meltdowns or tantrums, just a kid who names feelings, calmer evenings and time to enjoy them. Add one feelings chart a day from the free Kids Mental Health Bundle and give your kid support. Grab yours free.

Total VO: 171 words (reference 171).

7. Visual system and continuity

- **ASSET01 — character reference** (ASSET01): mom = slim female cartoon skeleton, ivory bones, long wavy auburn-copper hair, orange-mustard terry headband, large expressive eyes, translucent glass torso shell; kid ≈7, waist-height, short messy light-brown hair, translucent glass head and chest. Attach ASSET01 to every image/video generation.
- **Emotion signal:** red-orange storm cloud with sparks = dysregulated; soft steady blue glow = settled; gold light = the bundle's effect (S25–S26). The storm never shows creatures, gore or violence.
- **Palette:** S01–S16 dim warm amber interiors; S16 darkest teal-grey. S17–S27 bright white bedrooms/kitchen/tile, blue and gold accents.
- **Camera:** static or slow drift; S04/S16 slow push-in; S18 slow pull-back; hard cuts only.
- **Text:** all text is an editor overlay (none baked into images). Headline S01 only: "Kid Always" white bold sans + "DYSREGULATED?" gold bold serif caps, top ~10%. Captions as §5.
- **Product:** ASSET02 real bundle cover is **missing**. S27 shows a plain cream placeholder book; composite the real cover in edit. Worksheets in S17/S25 are generic drawn-face pages; swap for real bundle pages if the strategist wants product truth there too.
- **Audio:** stock synthetic voice "Emily" (Higgsfield Seed Audio preset; not a cloned real voice) — warm, calm female, conversational. Music: soft pad, darker 0–34 s, brighter lift from ~34 s (matches the reference's bed change). No SFX required; optional soft whoosh on S26 burst.

> Photoreal 3D CGI render, stylised animated explainer-ad look, vertical 9:16 frame. Keep the character designs exactly as in the attached reference image. Characters: the MOM: a slim female cartoon skeleton with ivory bones, long wavy auburn-copper hair, an orange-mustard terry-cloth headband, large expressive eyes in the skull, translucent clear glass-like body shell over the torso; the KID (about 7, waist height to mom): a small cartoon skeleton with short messy light-brown hair and a translucent clear glass-like head and chest. Friendly and slightly comic, never scary, no gore, no blood. Hook, first frame. Split screen with a thin vertical white divider down the middle. LEFT half: deep dark-red background, blue translucent X-ray-style render of the mom hunched with a hand on her forehead next to the kid mid-scream; a SMALL yellow glow sits in the kid's head. RIGHT half: dark teal background, the same mom and kid in blue X-ray style standing calm and upright with a faint blue glow in the kid's head. Static, centred, full bodies. Leave the top 12% of the frame empty for a headline. Keep the bottom 30% of the frame free of key detail (captions go there). No text, letters, numbers, logos or watermarks anywhere in the image.

12. Outstanding issues

1. **VO overrun (decision needed):** the stock VO runs ~70.3 s of speech at natural pace vs the 55.055 s edit. The draft keeps the picture cuts, never speeds the VO, caps pauses between lines at 0.35 s and holds S27 to 63.15 s — VO lines land 2–9 s after their shots from S02 on. Options: re-record the VO faster (~3.1 words/s, like the reference), shorten the script (creates v1.1), or re-time the picture to the VO (longer shots / new clips).
2. **Real bundle cover** (ASSET02) to composite over the placeholder book on S27, and optionally real worksheet pages for S17/S25.
3. **V1 script approval** (v1.0 of the full script).
4. **Music:** the bed is a local synth preview, extended with a crossfaded repeat to 63 s; license real music for the final.
5. **Skeleton-kid style check** for a kids' mental health audience.
6. **Processing fee** disclosure if checkout charges one.

14. Quality checks

#	Check	Status	Evidence
1	Upstream fidelity	Pass	Every VO line, headline, CTA and offer copied from V1 full script v1.0 and the Skill 2 cards; captions are the §5 groups word for word
2	Timeline	Pass (picture) / Issue (VO)	27 contiguous shots on the planned cuts 0.000–53.887 s; S27 extended to 63.153 s to fit the VO
3	Counts and copy	Pass	Headline 3, hook 10, total 171, CTA 3; Whisper heard 171 VO words
4	Visual coverage	Pass	28 keyframes + 6 preview frames downloaded and inspected; 27 clips inspected (frames across each edit window)
5	Visual accuracy	Pass with note	15 first-take clips passed; 12 failed (off-model invented bald kid, faceless kid, toothy skull mom, fade to black) and passed on 1 Kie redo. S27 book is a placeholder
6	Timing/readability	Issue	Captions follow the actual VO; VO overruns 55.055 s (see §15)
7	Prompt usability	Pass	Original and redo prompts saved per shot in `kie-video-tasks.json`
8	Handoff integrity	Pass	`build_assets.sh` + `build_video.py` rebuild everything from the saved links and clips
9	Approval integrity	Pass	Status = Awaiting strategist approval; no approval recorded
10	Execution feasibility	Issue	VO length decision and ASSET02 still open
11	Audio previews	Pass	3 mixes built; draft mix VO + bed at −18 dB, −16.4 LUFS integrated, peak −1.5 dB
12	Variation Previews	Pass	V1–V3 blocks with local frames, layout previews and audio

15. V1 draft video (Kie clips)

Field	Value
File	`video/KMH-V1-INS-20785b5fa6bd-v1.0-draft.mp4` (22.6 MB)
Specs	H.264 720x1280, 30 fps, 63.15 s (1,895 frames) · AAC 44.1 kHz 160 kb/s · −16.4 LUFS, peak −1.5 dB
Picture	Each clip trimmed from its start to its edit duration and cut in shot order on the planned times (hard cuts); S27 continues, then freezes, until 63.15 s
Overlays	S01 headline "Kid Always" (white Inter Bold) + "DYSREGULATED?" (gold Liberation Serif Bold caps), top ~8%, 0–2.703 s · 96 caption groups (§5), white Liberation Serif Bold Italic with soft shadow, centred at 74% height
Audio	AUD-V1-VO (stock voice, not sped up) + preview music bed at −18 dB, bed faded out over the last 1.5 s
S27 product	**Plain placeholder book — real bundle cover (ASSET02) still needed**
Build	`python3 build_video.py` (after `bash build_assets.sh` and the clip downloads)

Redo prompts keep the original action but state the cast explicitly ("only the mom, no children" / "only the kid" / "exactly two characters") and describe the kid's messy brown hair and cartoon face; first takes had described both characters in every shot, so Grok kept adding a second, bald kid. No shot needed a second redo.

VO timing (measured)

Speech in AUD-V1-VO runs 0.49–70.81 s (file 77.24 s incl. 6.3 s trailing silence). Rule used: never speed up; each line starts at its shot start or right after the previous line, with pauses between lines capped at 0.35 s (pauses inside a line kept). Captions are timed from Whisper word timestamps shifted with their line.

Shot	Shot time (s)	VO line placed (s)	VO late by (s)
S01	0.000–2.703	0.49–4.55	+0.49
S02	2.703–4.204	4.90–6.22	+2.19
S03	4.204–5.939	6.57–7.82	+2.36
S04	5.939–8.008	8.17–10.11	+2.23
S05	8.008–10.277	10.46–13.48	+2.45

S27	53.887–55.055	61.76–62.35	+7.87

⚠ **Overrun:** VO ends at 62.35 s, 7.3 s past the 55.055 s edit (natural speech would be ~15.8 s over without trimming pauses). From S02 on, lines land 2–9 s after their shots; S27 is held from 53.887 to 63.153 s, so the S22–S27 lines play over the S27 end frame. Decision needed — see §12.
