Data-Informed Adaptation — INS-20785b5fa6bd → Kids Mental Health Bundle

Skill: data-informed-adaptation (Skill 2 of 3) · Date: 2026-10-26 · Saved from the chat output so Skill 3 (storyboard-approval) can read it.

Upstream inputs - Skill 1 breakdown: `inspiration-breakdowns/INS-20785b5fa6bd-breakdown.md` (reference ad, 55.1 s, 9:16; spoken VO caption-derived, not transcribed). - Audience research: AvatarIQ report "Overwhelmed Olivia, the Mom Who Can't Find Her Own Calm" (Kids Mental Health Bundle; generated 2026-10-24). - Meta Ads: account 672030984698046 (KMH june), pulled 2026-10-26. - ClickUp: "Kids Mental Health" script bank (partly read; see gaps).

Brief from the user: all 5 variations use angle = dysregulated kid and persona = mom raising kids aged 35-44. Keep the reference's structure and art style. Hook example: "Is your kid always dysregulated?"

Account: 672030984698046 (KMH june) · **Product:** Kids Mental Health Bundle · **Windows:** 30d / 14d / 7d, all ending 2026-10-25 · **Hook rate:** 25% video views ÷ impressions × 100 · **Hold rate:** ThruPlays ÷ impressions × 100

Scope: Kids Mental Health Bundle only. - **IN (10 campaigns):** Photo Testing 7 Oct, BID ALEX 6 Oct, Video Testing 29 May (new pixel), Video Testing 29 May (old pixel), SCALING 19 Oct (runs only KM- ads), Link Testing 13 Oct, CPR Winner 6 Oct, New FB Testing 18 Sep (old pixel), New FB Testing 18 Sep (new pixel), Photo Testing 22 Oct Inc. - **OUT (excluded):** CBO CKW 7 Oct, ABO TESTING CKW 30 Sep (Calm Kids Workbook). - **Broken tracking flagged:** the 2 old-pixel campaigns (Video Testing 29 May NN, New FB Testing 18 Sep) spent $1,724 at 0.15 and 0.07 ROAS. The same video KM-525 makes 0.14 there and 1.08 on the new pixel. Their sales are excluded from creative verdicts.

Notes and gaps - **ClickUp partly read.** ClickUp's daily limit stopped the read after 14 KM scripts plus winners. Not read: Minimal Free Today B–F, the KM-525 variation tasks, KM-524/515. - **No break-even ROAS given.** Verdicts compare each concept to the product average: 0.97 ROAS, $13.67 per sale (without broken-pixel campaigns). - **Timings follow the reference ad's 55-second structure**, not the skill's 12-second template: B01 = 0:00–0:03, B02 = 0:33–0:38, B03 = 0:54–0:55. Everything else in INS-20785b5fa6bd carries over: problem is 60% of the runtime, the "what if" turn, "No more" lines shown over the old problem, golden-glow payoff, captions, dark-to-bright colour shift. - **Full 55-second script:** written for V1 in `adaptations/INS-20785b5fa6bd-KMH-V1-full-script.md` (all 20 lines, word counts matched to the reference). V2–V5 still have only B01 (hook), B02 (product reveal) and B03 (CTA). - **Art style:** same photoreal 3D skeleton style. The heroine is the auburn-haired skeleton mom with the headband. Her kid is a smaller skeleton with a see-through head and chest that shows a red-orange "storm" when dysregulated and a calm blue glow when settled. The reference's gross-out creature shot becomes a dark storm swirling inside the kid's head.

TABLE 1 — VARIATION RANKING

#1 BEST BET — V1: "IS YOUR KID ALWAYS DYSREGULATED?"

ANGLE	PERSONA	PAIN POINT
Dysregulated Kid — self-identification question	Mom raising kids, 35-44 ("Overwhelmed Olivia")	Meltdowns that blow up over small things, every day

HOOK TEXT — 10 tokens
"Is your kid always dysregulated, melting down over little things?"

B01 HOOK (0:00–0:03)	B02 PRODUCT REVEAL (0:33–0:38)	B03 CTA (0:54–0:55)
Headline and VO start together from frame 1. **Headline:** "Kid Always DYSREGULATED?" (3 words; white sans + gold serif caps, top of frame). **Picture:** X-ray split screen. Red side: mom skeleton holds her head while a small skeleton kid screams, and the storm glow in its head grows yellow → red. Teal side: mom and kid sit calmly with a faint blue glow. VO above with word-by-word captions.	**VO:** "Just one printable feelings chart with your kid every day" (10) → "can help them name feelings," (5). **Picture:** bright white bedroom; mom and kid on the bed holding a printed feelings chart; cutaway: glowing path travels through the kid's see-through head, red storm fades to blue.	**VO:** "Grab yours free." (3). Mom skeleton holds the printed bundle at shoulder height, smiling.

META DATA EVIDENCE	AUDIENCE DATA EVIDENCE
KM-388-INS-130 (Dysregulated Kids): $1,699 → **1.13 ROAS**, $12.97 per sale — best ROAS of any concept with over $1k spend. Women 35-44 bring **39.3% of sales** on 35.8% of spend.	"…constantly walking on eggshells, just waiting for the next explosion to occur, usually over something small." Desire: "help a dysregulated child calm down" (high weight, 42 upvotes).

WHY THIS WINS	WHAT TO AVOID
The user's hook, as a yes/no question in the buyer's own word, on the angle with the best ROAS, aimed at the biggest buying group.	Saying "ADHD" or "fix". Moms object: "Everything I find online is geared more towards helping ADHD kids focus and that's really not him."

#2 STRONG — V2: "MOM BARELY HOLDING ON"

ANGLE	PERSONA	PAIN POINT
Dysregulated Kid — co-regulation (calm mom, calm kid)	Mom raising kids, 35-44, who never learned these skills herself	Her own calm runs out, and she fears it's making things worse

HOOK TEXT — 10 tokens
"Is your kid always dysregulated, and you're barely holding on?"

B01 HOOK (0:00–0:03)	B02 PRODUCT REVEAL (0:33–0:38)	B03 CTA (0:54–0:55)
Headline "Losing Your CALM?" (3) and VO with captions start together from frame 1. **Picture:** split screen. Red side: storm glows in the mom's chest as the kid's head storm grows. Teal side: both sit calm.	**VO:** "Just five minutes of coping skills together every single day" (10) → "can help you both reset," (5). **Picture:** mom and kid on the bed doing a coping-skills page together; a glowing path runs through both see-through chests at once.	"Grab yours free." (3), held next to the mom's relieved face.

META DATA EVIDENCE	AUDIENCE DATA EVIDENCE
KM-324-INS-072 (Dysregulated Kids, "starts with regulating ourselves"): $961 → **1.06 ROAS**, 39.9% hook / 7.1% hold. Concepts briefed for moms 35-44 so far all used ADHD or POV hooks (KM-420 0.33, KM-437 0.25, KM-530 0.82); a narrated dysregulation story hasn't been tested for this persona.	Top pain, 92 upvotes: "I have zero emotional regulation skills and it's messing my son (4) up." Desire, 85 upvotes: "I never EVER want my daughter to feel like I did growing up."

WHY THIS WINS	WHAT TO AVOID
The most-upvoted pain in the research, on an angle that's already profitable.	Blaming the mom. Show her tired, never at fault. The "No more" lines should end on her calm face.

#3 SOLID — V3: "EVERY TIME PLANS CHANGE"

ANGLE	PERSONA	PAIN POINT
Dysregulated Kid — everyday-trigger story (closest to the reference)	Mom raising kids, 35-44	Small transitions (shoes, screens off, bedtime) set off meltdowns

HOOK TEXT — 10 tokens
"Every time plans change, it starts with a little meltdown."

B01 HOOK (0:00–0:03)	B02 PRODUCT REVEAL (0:33–0:38)	B03 CTA (0:54–0:55)
Headline "Always Melting DOWN?" (3) and VO with captions start together from frame 1. **Picture:** split screen. Red side: kid's head glow grows as a tablet is taken away. Teal side: kid stays calm.	**VO:** "Just one printable feelings thermometer on the fridge every morning" (10) → "can help them notice feelings," (5). **Picture:** kid points at the thermometer on the fridge; a glowing path travels through the kid's head.	"Grab yours free." (3)

META DATA EVIDENCE	AUDIENCE DATA EVIDENCE
KM-525-INS-029 (narrated mom story, new pixel): **33.2% hook / 16.5% hold, 1.08 ROAS** — the only video in the 25–35% hook sweet spot. Videos with very high hook rates (46–58%: KM-521, KM-501, KM-546, 11472) hold only 4.6–7.8% and make 0.69–0.95 ROAS.	Research angle: "Meltdowns over socks, shoes, or a small disappointment can leave a parent feeling just as overwhelmed as the child."

WHY THIS WINS	WHAT TO AVOID
Uses the reference's own hook pattern ("Every time you [X], it starts with a little [Y]"), so the shot-by-shot escalation carries over directly.	Turning the escalation into a list of ADHD symptoms. Keep the triggers everyday and specific.

#4 TEST — V4: "WALKING ON EGGSHELLS"

ANGLE	PERSONA	PAIN POINT
Dysregulated Kid — whole-household tension	Mom raising kids, 35-44	The whole family tiptoes, waiting for the next explosion

HOOK TEXT — 10 tokens
"Does your whole house walk on eggshells around your kid?"

B01 HOOK (0:00–0:03)	B02 PRODUCT REVEAL (0:33–0:38)	B03 CTA (0:54–0:55)
Headline "Walking On EGGSHELLS?" (3) and VO with captions start together from frame 1. **Picture:** split screen. Red side: the family tiptoes over cracked eggshells while the kid's storm grows. Teal side: a calm family dinner.	**VO:** "Just one quick reset step together before every big moment" (10) → "can help them calm down," (5). **Picture:** mom and kid do a reset step at the door; a glowing path settles the storm.	"Grab yours free." (3)

META DATA EVIDENCE	AUDIENCE DATA EVIDENCE
No eggshells hook has been tested. Closest is KM-527-INS-206 ("big feelings"), with the account's best hold, 26.8%; its 0.07 ROAS is on the broken old pixel, so there's no clean sales read.	The research's recommended scroll-stopper: "We all feel like we're constantly walking on eggshells, just waiting for the next explosion to occur."

WHY THIS WINS	WHAT TO AVOID
Strong audience language but no Meta sales evidence yet, so it ranks as a test.	Fear-heavy pictures. Make the "explosion" a cartoon storm cloud, never shouting or violence.

#5 BACKUP — V5: "FINE AT SCHOOL, EXPLODES AT HOME"

ANGLE	PERSONA	PAIN POINT
Dysregulated Kid — after-school collapse	Mom raising kids, 35-44	The kid holds it together at school, then falls apart at home

HOOK TEXT — 10 tokens
"Is your kid fine at school but dysregulated at home?"

B01 HOOK (0:00–0:03)	B02 PRODUCT REVEAL (0:33–0:38)	B03 CTA (0:54–0:55)
Headline "Explodes After SCHOOL?" (3) and VO with captions start together from frame 1. **Picture:** split screen. Teal side: calm kid at a school desk. Red side: the same kid at the front door, storm glow growing.	**VO:** "Just one after-school feelings check-in with your kid every day" (10) → "can help them unpack school," (5). **Picture:** a check-in at the kitchen table; a glowing path clears the storm.	"Grab yours free." (3)

META DATA EVIDENCE	AUDIENCE DATA EVIDENCE
School-framed hooks have read weaker when a teacher leads them: 11472 ("she's dysregulated", teacher POV) $289 → 0.69 ROAS. KM-527 ("My kid comes home with big feelings") is the only parent-voiced test, and it's on the broken pixel.	"My kiddo who I thought has ADHD is a model student in school, but struggles hard at home." (89 upvotes)

WHY THIS WINS	WHAT TO AVOID
A distinct, highly upvoted pain that hasn't been tested; it overlaps the teacher persona, so it's the backup.	Blaming teachers or school, or implying a diagnosis.

Hook word-count check

Reference spoken hook: "Every time you eat, it starts with a little bloating." = 10 tokens: [Every] [time] [you] [eat,] [it] [starts] [with] [a] [little] [bloating.]

- **V1:** [Is] [your] [kid] [always] [dysregulated,] [melting] [down] [over] [little] [things?] = 10 ✅
- **V2:** [Is] [your] [kid] [always] [dysregulated,] [and] [you're] [barely] [holding] [on?] = 10 ✅
- **V3:** [Every] [time] [plans] [change,] [it] [starts] [with] [a] [little] [meltdown.] = 10 ✅
- **V4:** [Does] [your] [whole] [house] [walk] [on] [eggshells] [around] [your] [kid?] = 10 ✅
- **V5:** [Is] [your] [kid] [fine] [at] [school] [but] [dysregulated] [at] [home?] = 10 ✅
- **Headlines:** all 3 tokens ✅ (reference 3). **Product lines:** 10 + 5 ✅ (reference 10 + 5). **CTA:** 3 ✅ (reference 3).
- **Dual-channel hook:** the reference runs the headline and the VO/captions together from frame 1, so every B01 above fires both channels at once.

TABLE 2 — DATA APPENDIX

SECTION A — PRODUCT SNAPSHOT

Window	Spend	Sales	ROAS	Cost/Sale	Trend
30d	$19,165.33	1,289	0.89	$14.87	Baseline. Without broken-pixel campaigns: 0.97 ROAS, $13.67 per sale
14d	$8,963.57	594	0.95	$15.09	▲ ROAS vs 30 days (broken-pixel spend stopped)
7d	$3,833.40	250	0.94	$15.33	▬ ROAS flat; cost per sale creeping up

SECTION B — WHO ACTUALLY BUYS (30 days)

Segment	Spend Share	ROAS	What We Brief	Status
Women 35-44	35.8% (39.3% of sales)	0.98	Moms 35-44 + Female Teachers 25-44	🎯 ON
Women 45-54	24.1% (23.2% of sales)	0.85	Not briefed	🟡 GAP
Women 25-34	18.9% (21.2% of sales)	0.96	Female Teachers 25-44	🎯 ON
Women 55-64	11.6% (9.5% of sales)	0.76	Not briefed	❌ LOSING
Women 65+	3.5% (1.7% of sales)	0.51	Not briefed	❌ LOSING
Women 18-24	1.9% (2.1% of sales)	0.96	Not briefed	🟡 GAP (too little spend to judge)
Men 35-44 / 45-54 / 25-34 / 55-64 / 65+ / 18-24	1.2 / 0.9 / 0.6 / 0.4 / 0.2 / 0.1%	0.87 / 0.95 / 0.47 / 0.32 / 0.19 / 5.21 (on $11)	Not briefed	❌ LOSING (3.4% of spend, 0.79 ROAS overall)
Gender unknown, all ages	0.9%	0.47	—	❌ LOSING

SECTION C — EVERY CONCEPT TESTED (new-pixel sales only)

Verdict thresholds: 🏆 ≥1.05 ROAS on ≥$1.5k · ✅ ≥1.05 · 🟡 0.90–1.05 · ❌ below 0.90 on ≥$150 (or very low ROAS on ~$100) · ⚬ too little clean spend to judge.

Concept	Angle	Spend	ROAS	Hook% / Hold%	Verdict	Key Reason
Minimal Free Today A–F (photo)	Free-today offer, worksheets	$5,355	1.04	photo	🟡	Most sales (439), just under the ✅ bar; 12 of 50 ads active
KM-521-INS-069	Teacher: "Please don't…"	$2,905	0.89	47.7 / 7.8	❌	Very high hook, weak hold
KM-501-INS-196	Teacher: free calm-down pack	$2,155	0.95	46.1 / 5.6	🟡	Volume, but weak hold
KM-388-INS-130 (photo)	Dysregulated Kids	$1,699	1.13	photo	🏆	Best ROAS at scale
KM-324-INS-072	Dysregulated Kids (co-regulation)	$961	1.06	39.9 / 7.1	✅	Profitable; 2 ads active
KM-525-INS-029	Narrated mom story	$869 (+$1,144 broken pixel)	1.08	33.2 / 16.5	✅	Only video in the sweet spot
KM-546-INS-221	ADHD / natural support	$700	0.88	57.2 / 6.0	❌	Highest hook rate, weak conversion; 3 ads still active
V-series (V1/V3/V4)	Hook/CTA variants	$685	0.88	28.2 / 13.6	❌	Good hold, weak sales
11472 V9 Hook	Teacher: "she's dysregulated"	$289	0.69	57.6 / 4.6	❌	Hold collapses
KM-553-INS-225	Teacher–student POV	$278	0.83	48.1 / 4.9	❌	Weak hold
KM-506-INS-201 (photo)	ADHD Kids	$253	1.02	photo	🟡	Near average
Halloween-03 (photo)	Seasonal sale	$244	0.84	photo	❌	18 ads active below average
KM-535-INS-214	Natural wellness	$237	0.99	41.2 / 4.4	🟡	Near average

Concept	Angle	Spend	ROAS	Hook% / Hold%	Verdict	Key Reason
KM-335 (photo)	ADHD Kids	$161	1.01	photo	🟡	Small read
KM-530-INS-208	Mom 35-44 playroom POV	$157	0.82	42.7 / 5.3	❌	Weak hold
KM-420-INS-139	Mom 35-44 ADHD POV	$142	0.33	11.3 / 3.5	❌	Weakest hook
KM-437-INS-076	Mom 35-44 "Did you know" ADHD	$96	0.25	51.5 / 5.6	❌	$31.84 per sale
KM-527-INS-206	Big feelings demo	$70 (+$544 broken pixel)	0.25	27.3 / 12.9 (26.8% hold on old pixel)	⚬	Tracking broken; worth a clean retest
KM-531 / 554 / 534 / 436 / 555 / 528 / 549, 13148-2, KM-Reddit01	Mixed	$0–$54 each	0–0.77	various	⚬	Starved, no read

Product facts (from ClickUp scripts, verbatim; to confirm)

- **Name and offer:** "FREE Kids Mental Health Bundle", sold as free today ("Grab it FREE today!!", "Claim yours FREE Today!!").
- **Contents:** "feelings charts, coping skills, and quick reset steps"; "feelings thermometers, coping skills, emotional regulation activities"; "1000+ printables, calm-down tools, emotion worksheets"; cover title "KIDS MENTAL HEALTH (A Parent & Educator Guide)".
- **Delivery:** printable digital download ("print the tools", "digital only", "Grab free digital download").
- **Price anchors disagree:** "$27", "$29.99 → FREE", "FREE (was $99.99)", "JUST COVER A SMALL PROCESSING FEE", and a landing page noted at "$39.00 (crossed-out $99.00)". **Offer confirmed by the user (2026-10-26): "free today" / "FREE Kids Mental Health Bundle".** All CTAs now read "Grab yours free." (3 words). If a processing fee applies at checkout, disclose it.

Open decisions for the strategist

1. **Offer:** confirmed as "free today" / "FREE Kids Mental Health Bundle". Check any processing fee is disclosed.
2. **Skeleton style:** kept as briefed, but skeleton children may read as morbid in a kids' mental health ad. Check before producing all five.
3. **Women 45-54:** 23% of sales with no persona briefed; a candidate for a later test.
4. **Full script:** V1 is written (`INS-20785b5fa6bd-KMH-V1-full-script.md`) and awaits approval; V2–V5 would need the same before their own storyboards.
